

Luminous LB600PRO

BASIC CONTENT

Title	Luminous LB600PRO - 600VA/360W UPS System
Additional Features	LB600PRO is Line interactive UPS with load capacity of 600VA/360W, Micro Controller Based Design with Automatic Voltage Regulation (AVR) Technology, Battery Saver with Smart Charge and Intelligent Continuous Charging, Wide Input Voltage Window of 140V-300V and Generator Compatible Suitable for Indian Power Condition
Description	Luminous by Schneider Electric is Leading Indian Brand for Power Protection Devices and provides High Quality, Best Value for Money products for your critical applications. Luminous LB600UNO is loaded with state-of-the-art features that deliver continuous power supply and protect your computer and peripherals from power surges, drop in line voltage, brownouts, blackouts and other critical hazards. Smart Charge and Intelligent Continuous Charging Technology ensure longer battery life and faster charging. The entire range of Luminous Line interactive UPS Systems are generator compatible and equipped with built in Automatic Voltage Regulator which not only protects connected equipment but lets it run even when line voltage is too low or too high. At Luminous the onus is to empower you to protect your data and enable you to keep working without any hassle during unscheduled power outages.
